

About WageMap

Table of Contents

The following document provides an overview of **the WageMap consortium** and the **Living Wage Reference Standard** published in November 2025.

1. About WageMap
2. How WageMap Works
3. The Living Wage Reference Standard (LWRS)
4. Implementation of the LWRS

01

About WageMap

The Living Wage Data Problem

While progress on living wages has been made, WageMap seeks to tackle the following core issues associated with living wage data.

Lack of Transparency

There is a lack of transparency **in the differences between methodologies** which makes it challenging for actors to **identify how estimates compare to one another**.

Limited Comparability

The **lack of standardized and universally accepted method** to calculate a living wage leads to **market distortion** and **disparities** in compensation and working conditions.

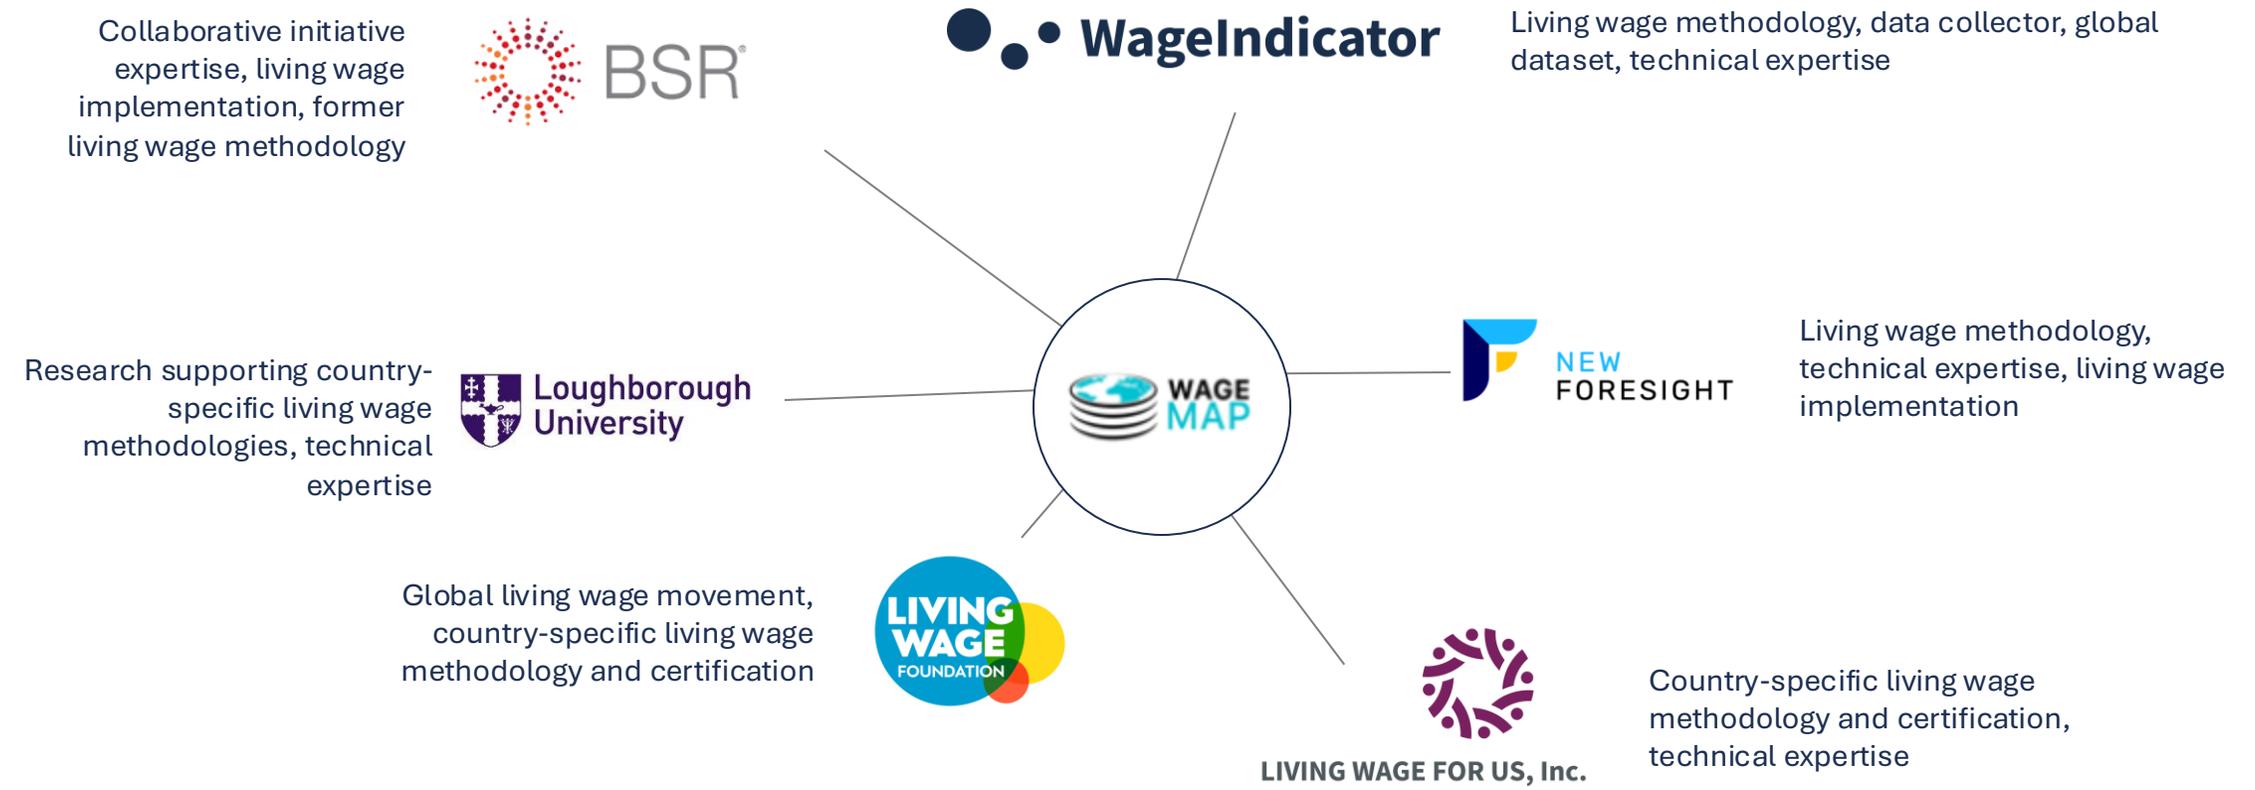

Weak Implementation Capacity

These factors have weakened implementation efforts as **actors across value chains use different living wage data, driving greater confusion**.

Why WageMap Was Founded

In 2023, **six leading living wage data and service providers** came together to try to address the data inconsistencies and confusion that had become major barriers to scaling progress on living wage globally.

How WageMap Solves the Living Wage Data Problem

WageMap's mission is to support the **achievement of living wages for workers globally** and **drive alignment** across living wage methodologies and frameworks by establishing a reference standard and creating an aggregated view of existing estimates.

Core Priorities

1. Establish a Living Wage Reference Standard

Develop a **universally accepted Living Wage Reference Standard method** to calculate a living wage.

Guide data providers, offer a **foundation for creating incentives** and **promote transparency** in employer actions.

2. Create an aggregated map of living wage estimates

Assess existing national and global living wage benchmarking methodologies against the Living Wage reference standard.

Determine a single living wage estimate value that is most aligned with the Living Wage reference standard **in specific geography**.

Secondary Priorities

Build a **Living Wage Knowledge Hub** to support shared understanding, learning and informed use of living wage data among stakeholders.

Expand the global movement and encourage collaboration, knowledge-sharing and collective action to accelerate progress towards living wages.

WageMap Funders*

Launch Partners

- Launch partners provide a fixed, three-year financial commitment to enable the WageMap proposition to be put into practice.
- Current paying Launch Partners are **Hershey, Mondelez**, and an **undisclosed partner**.

Members

- Members provide a fixed, three-year financial commitment to enable the WageMap proposition to be put into practice.
- WageMap's current paying Member is **Target Corporation**.

Sponsors

- Sponsors provide a financial commitment determined on an individual basis to contribute to the WageMap activities.
- WageMap's current sponsors are **ISS World, Bettys and Taylors of Harrogate, McKinsey, and Linklaters**.

*WageMap is additionally funded by Swedish International Development Cooperation Agency (Sida) as part of their initiative to incubate, support, and amplify multi-stakeholder collaborations in support of the sustainable development goals.

02

How WageMap Works

Our Principles

Transparency

Share information, actions, decisions, and decision-making processes in a clear and accessible manner to all stakeholders involved.

Human Rights

Uphold the fundamental, universal, inalienable and indivisible rights that every person is entitled to.

Evidence-Based Decision-Making

Prioritize evidence-based insights in all decisions, minimizing political influences. Involve both external and internal experts to ensure a well-round perspective on each issue.

Multiple Perspectives

Consider multiple perspectives on any given topic or question to inform decisions. Ensure that the ultimate goal remains the guiding principle throughout the decision-making process.

Adherence to Academic Standards

Apply rigorous academic norms, such as the principle of hearing both sides (*audi alteram partem*) and revising hypotheses, and maintaining scholarly integrity.

Driving Alignment with Existing Living Wage Efforts

Building on what already exists

- We recognize that **many organizations** are actively advancing living wage methodologies and implementation.
- WageMap is building on **existing frameworks and best practices** to build the Living Wage Reference Standard.
- WageMap's role is to **drive alignment and coherence** across methodologies, strengthening comparability and practical application.
- **Stakeholder consultation** is foundational to our approach, with continuous engagement across the living wage ecosystem.
- The consortium remains **open to additional members** to ensure **inclusiveness and credibility**.

Several contributors beyond the WageMap consortium include:

Staying in Lockstep with the ILO on Living Wage

The Living Wage Reference Standard is designed to be in alignment with the ILO principles. As the ILO expands its guidance on living wage, WageMap will continue to evolve the standard.

Definition

In line with the ILO Constitution and the Philadelphia Declaration, and consistent with the spirit of the Universal Declaration of Human Rights (UDHR), **the ILO denotes that the concept of the living wage is:**

“the wage level that is necessary to afford a decent standard of living for workers and their families, taking into account the country circumstances and calculated for the work performed during the normal hours of work; calculated in accordance with the ILO’s principles of estimating the living wage, as outlined below; and to be achieved through the wage-setting process in line with ILO principles on wage setting.”

ILO Principles for Living Wage Benchmarking

Estimation of the **needs of workers and their families** through evidence-based methodologies

Consultation with representative employers' and workers' organizations on living wage estimates and **involvement of social partners** throughout their development, with a view to ensuring **national and/or local ownership**

Transparency, including details with regard to data sources and methods of processing, that are open to scrutiny, are comprehensive and replicable

Robustness of the data in terms of **representativeness and transparent data collection** methods

Timely public availability of the estimates, data and methodologies

Specification on whether estimates are gross or net, namely **whether items such as social security contributions are included or not**

Regular adjustments to consider changes in the cost of living and the patterns of consumption

Quality control, including sound technical review, validation, as well as periodic review for continuous improvements

Promotion of gender equality and non-discrimination

Consideration of the **regional or local context** and socio-economic and cultural realities

03

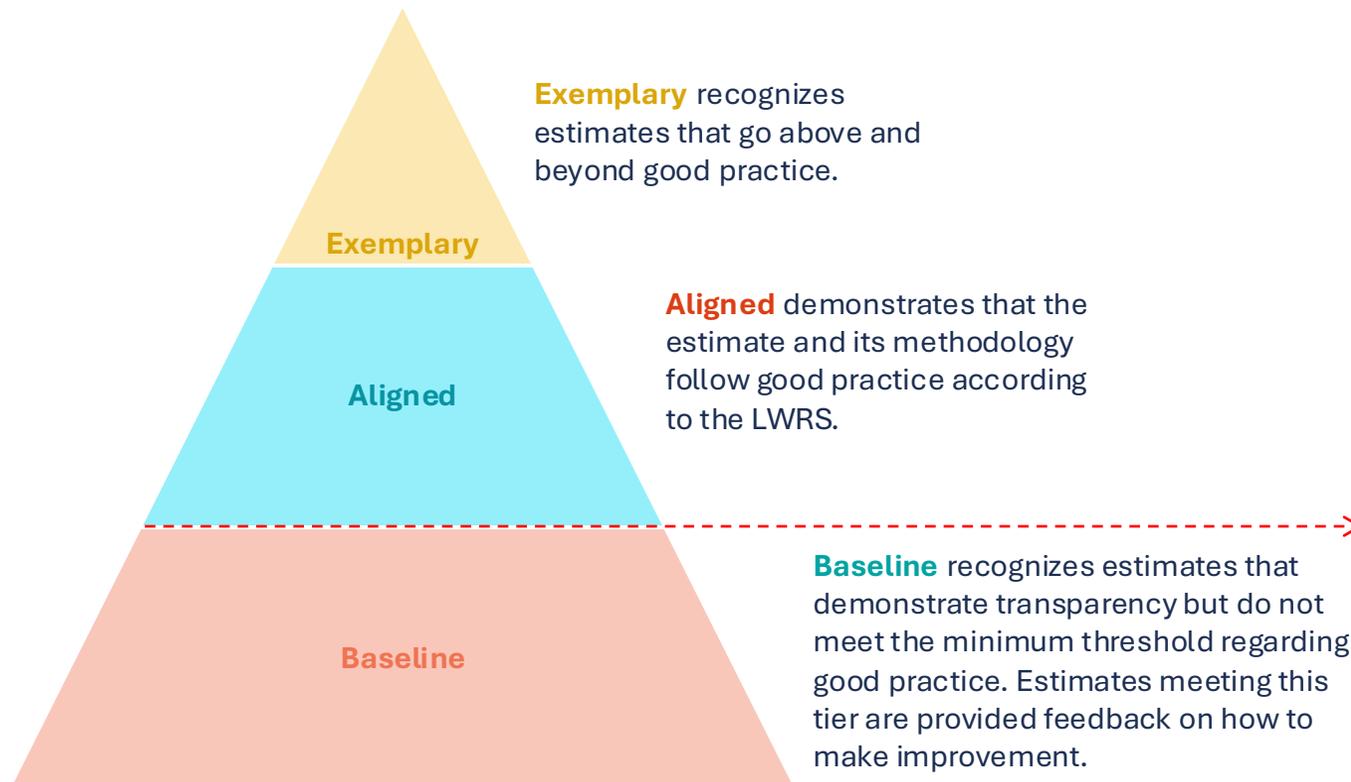

The Living Wage Reference Standard

What is the Living Wage Reference Standard

Definition

The Living Wage Reference Standard is a document which can be used to assess living wage estimates according to three categories containing quality criteria: Baseline, Aligned, and Exemplary.

Purpose

Create a universally accepted 'Standard' that:

Provides greater consistency clarity and alignment on approaches to living wage estimation

Guides methodology owners about good practices

Increases credibility and transparency of employer initiatives on living wage

How are the methodologies evaluated?

1. Assess the methodology against the questions included in the Standard

To ensure evaluations are as clear and consistent as possible, the methodology used a **binary approach** where each criterion is scored as **Met** or **Not Met**. The binary approach eliminates ambiguity and allows users to quickly understand whether a requirement has been fulfilled.

2. Conduct an overall methodology assessment against the quality criteria

The framework is organized into **three distinct categories** – **Baseline, Aligned, Exemplary** – with each tied to a specific set of yes/no questions. Scoring templates have been developed to illustrate how this approach works in real assessments.

1.2.4: MIGRANT LABOR (3 QUESTIONS)

QUESTIONS	Explanation	Assessment
BASELINE REQUIREMENTS		
1. DOES THE ESTIMATE AS IT REGARDS MIGRANT LABOR, ALIGN WITH THE PRINCIPLE OF EQUAL REMUNERATION FOR WORK OF EQUAL VALUE? ¹⁸	Living wage estimates must not encourage pay discrimination via its treatment or consideration of migrant laborers in the population. As such, a living wage must ensure that a “typical worker” in an area is able to afford decency. It should not create a living wage estimate that only addresses migrant populations apart from local populations.	Met / Not Met
ALIGNED REQUIREMENTS		
2. IS THE LIVING WAGE ESTIMATE REPRESENTATIVE OF THE COSTS OF LIVING WITHIN THE POLITICAL BOUNDARIES OF THE WORK LOCATION?	Decent work requires that workers can afford a decent livelihood within a reasonable commute to their workplace. If an area often has migrant laborers commuting daily for work from a close neighboring country, the cost of living estimated to produce a living wage estimate is to be limited to costs within the country of work. This acknowledges that many workers cannot simply move to lower-cost neighboring countries, and that suggesting they do so may disregard their cultural and community ties to the country where they work.	Met / Not Met
EXEMPLARY		
3. IF COSTS OF LIVING ARE INCLUDED ACROSS POLITICAL BOUNDARIES, IS THE CROSSING OF THOSE BOUNDARIES DUE TO THE FACT THAT ALL ALLOWABLE EXCEPTIONS ARE MET AND PUBLICLY EXPLAINED?	Including costs of living across a national boundary in a way that respects all Baseline and Aligned Requirements must show through thorough evidence that in an area: a) <u>most</u> workers at a living wage in a living wage estimate area are from a different country; b) <u>all</u> workers in a work location are legally permitted to live in the country of their choice and access the more affordable cost of living while not being overburdened by commuting difficulties to arrive at their work location across national borders on a daily	Met / Not Met

Contents of the Standard

Part 1 | Overarching Frameworks

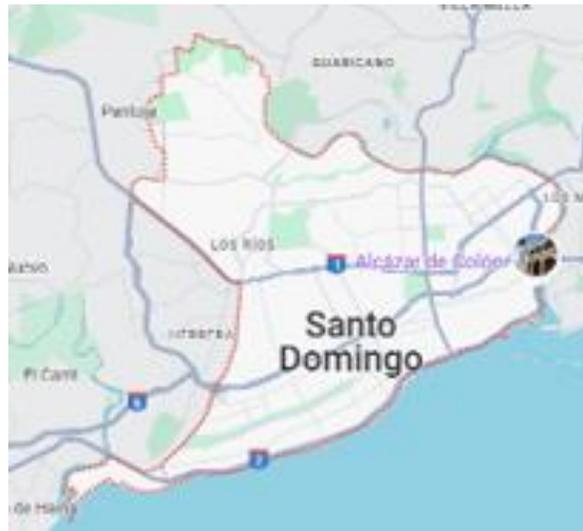

Section	Overview
Data collection and Transparency	<ul style="list-style-type: none"> Data Collection and Sharing Academic Rigor – Survey-based Data and Focus Group Transparency Conflict of Interest Representative Data
Geographic scope and Timing of estimates	<ul style="list-style-type: none"> Geographic Scope Quality Control Local Input of Ownership Migrant Labor Timing for Updates of Data
Family size, Number of workers per family and Working Hours	<ul style="list-style-type: none"> Family Household Size – General Family Size – Number of Adults and Children Number of Workers per Family Working Hours
Accounting for public Benefits	<ul style="list-style-type: none"> Applicability of Public Benefits Accessibility of Public Benefits Accounting for Public Benefits

Part 2 | Items on Cost of Living

Section	Overview
Nutritious Food	<ul style="list-style-type: none"> Nutrition Variability of Diet Price Collection
Housing	<ul style="list-style-type: none"> Housing Size Rent vs. Home Ownership Utilities, Furnishings, Insurance, Maintenance and Repairs, Taxes, and Mandatory Service Charges
Healthcare	<ul style="list-style-type: none"> Data Collection and Transparency – General
Care	<ul style="list-style-type: none"> Ensuring Timely Childcare Payment Edler Care / Retirement
Transportation	<ul style="list-style-type: none"> Assessing Transportation
Other Categories (COICOP)	<ul style="list-style-type: none"> Alcoholic Beverages, Tobacco and Narcotics Clothing and Footwear Furnishings, Household Equipment and Routine Household Maintenance Information and Communication Recreation, Sport, and Culture Education Services
Savings for Special or Emergency Events	<ul style="list-style-type: none"> Amount Included
Mandatory Deductions from Pay	<ul style="list-style-type: none"> Depth and Specificity

What could the WageMap Aggregated Data Map look like?

Estimate Country: Dominican Republic
Estimate Coverage: Santo Domingo

Scoring Framework:

- Exemplary
- Aligned
- Baseline

Methodology owners will be able to “opt in” to different levels of participation in the WageMap publication.

Living Wage Reference Standard Categories and Scoring
 This standard is used as a point of comparison. The most aligned living wage estimate is provided along with the associated data below.

The scoring below is illustrative only, showing two of the six subcategories within the first category. The final version would include scoring across all categories.

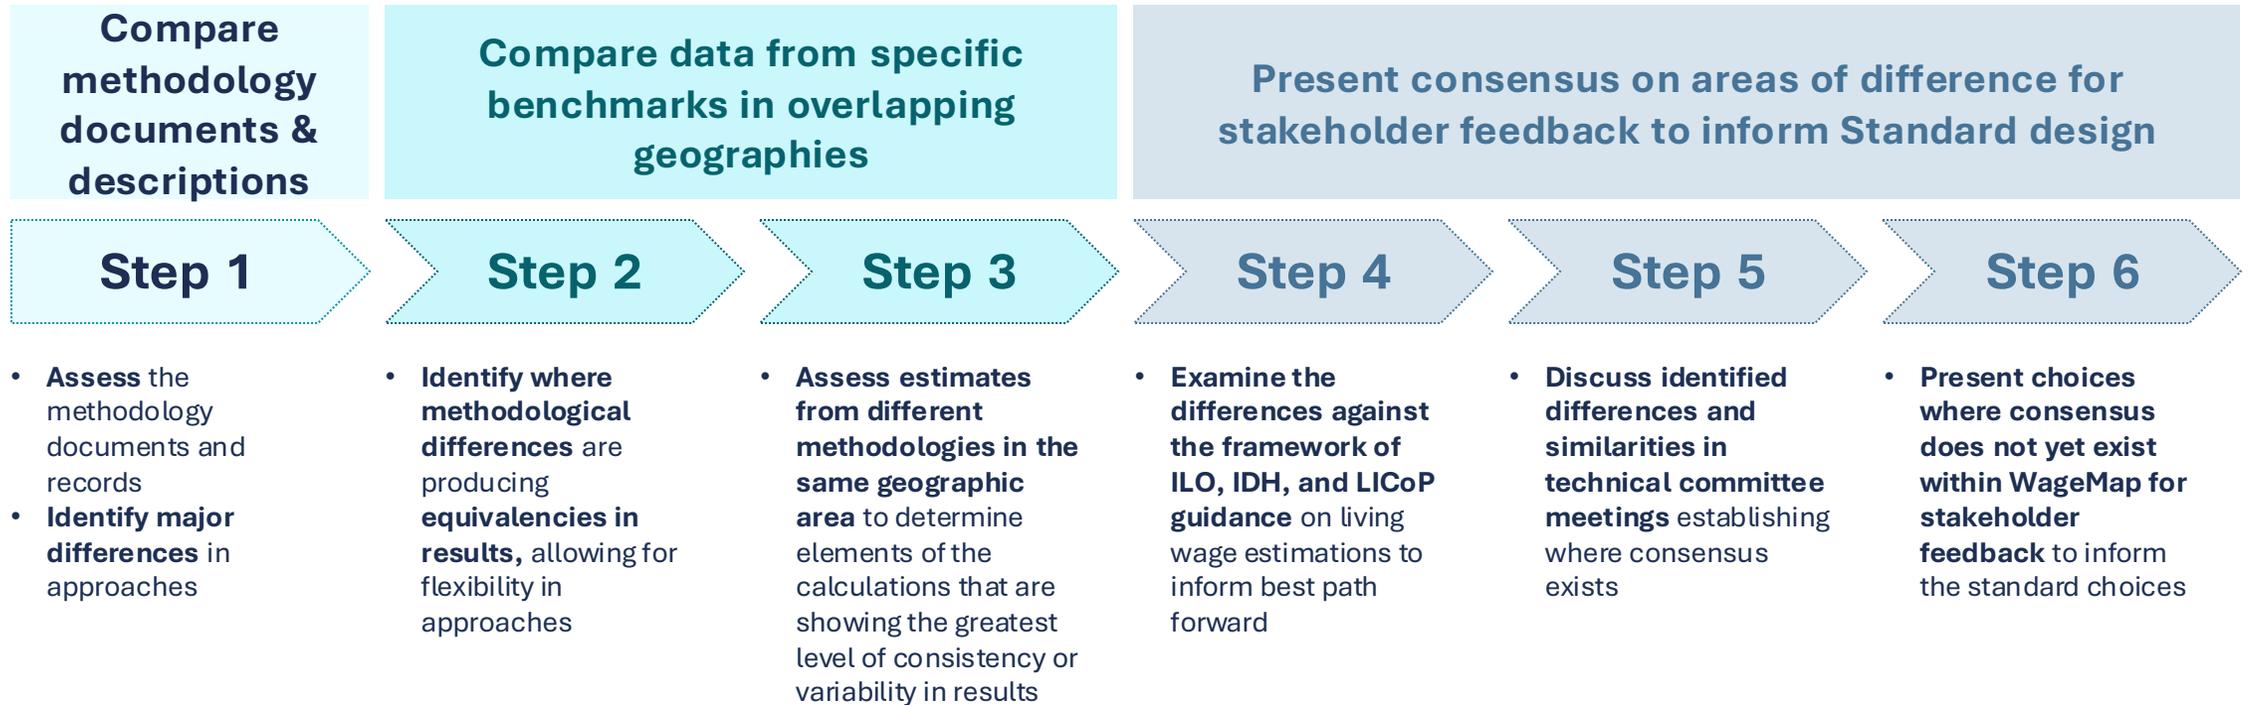

Full Opt-in	Partial Opt-in	No Active Opt-in

*WageMap continues to explore different ways to visualize their data map based on user feedback, copyright and data privacy legalities. WageMap welcomes feedback on the proposed concept.

How was the LWRS developed?

Which methodologies and estimates were evaluated in developing the LWRS?

04

Implementing the Living Wage Reference Standard

WageMap Pilot Roadmap

WageMap proposes to pilot a scalable assessment approach, combining a rule-based scoring aligned with the LWRS, exploration of AI-supported assessments to enable global scale, and human oversight to ensure credibility and fairness.

January

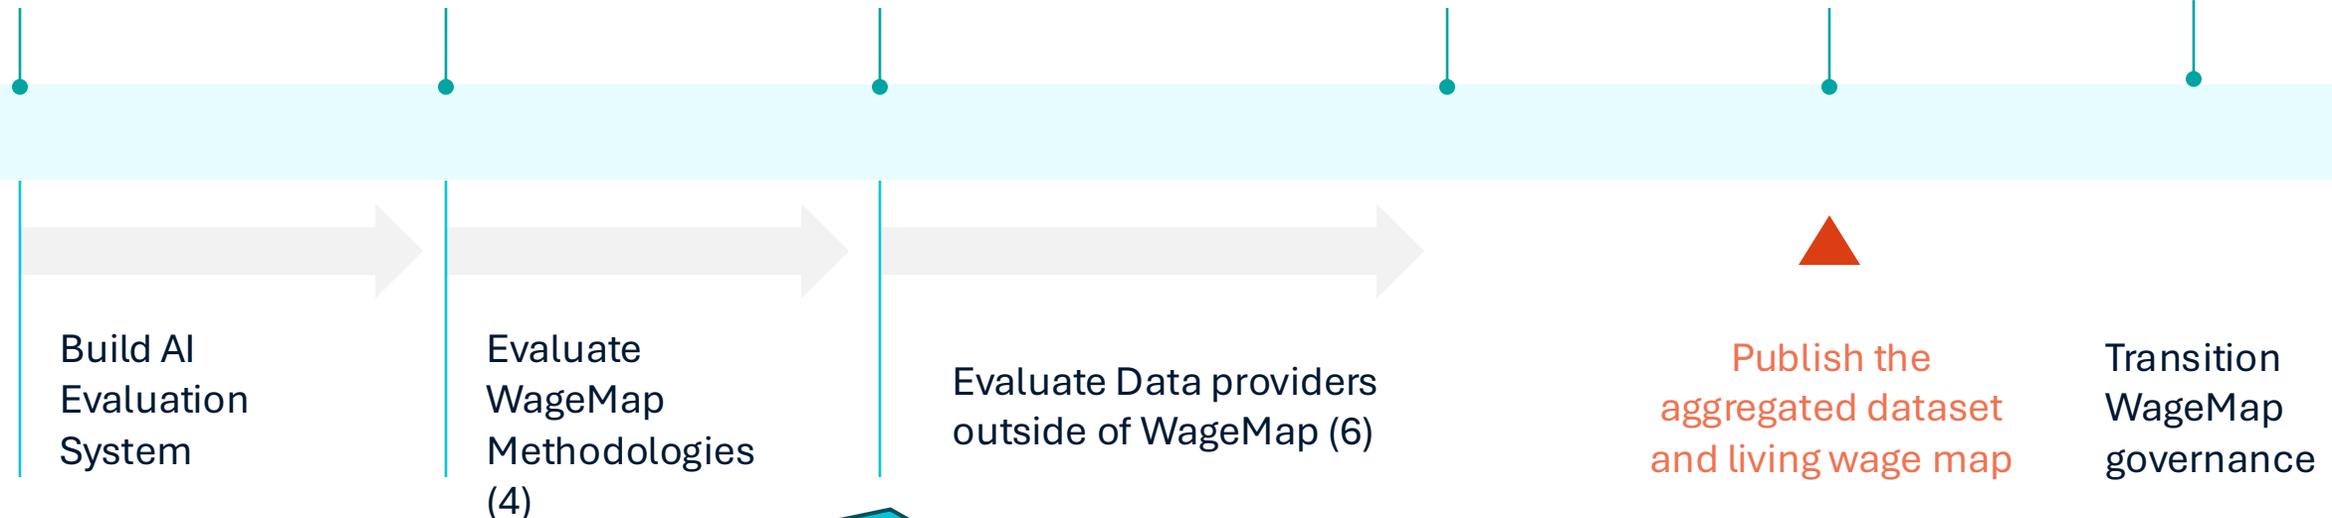

March

May

September

November

December

Year 3 will focus on evaluating 10 methodologies and their estimates against the LWRS and on publishing the results on the WageMap website.

WageMap AI Assessment of Methodologies

WageMap is developing an AI-assisted assessment system to evaluate living wage methodologies against our Living Wage Reference Standard.

Why AI-Assisted Assessment?

- **Consistency:** The same evidence receives the same score across all assessments
- **Transparency:** Every decision is documented with specific evidence and rationale
- **Institutional Memory:** Past decisions inform future assessments, ensuring fairness
- **Efficiency:** Comprehensive assessments completed in a structured, timely manner
- **Privacy:** Your proprietary information remains protected throughout the process and we evaluate with publicly available data exclusively unless you choose to share something additional

A Council of Human Assessors

WageMap has consistently shared that it is **building a model in which external evaluators can assess how the Living Wage Reference Standard is implemented** for methodologies.

Even with an AI initial assessment, WageMap continues to explore how it can implement a council of human assessors beyond the pilot.

What to Expect:

What can we deliver with our current funding?

A **public site** with a comparison of how 10 methodologies compare to each other across different criteria

A publication of **estimates by living wage data providers that opt in** to having their living wage estimates accessible*

**This is dependent on data providers opting in. It is unlikely that global data providers will be ready in 2026 to opt in. It will likely be mostly regional and country-specific data providers that directly showcase living wage benchmarks while others provide links to benchmarks on their website.*

What could we deliver with additional funding?

Improved **UX and functionality of public dataset** to support functionality and usability

A council of **human assessors** to review overview AI assessment

Guidance on how **approaches to total remuneration** relate to the standard

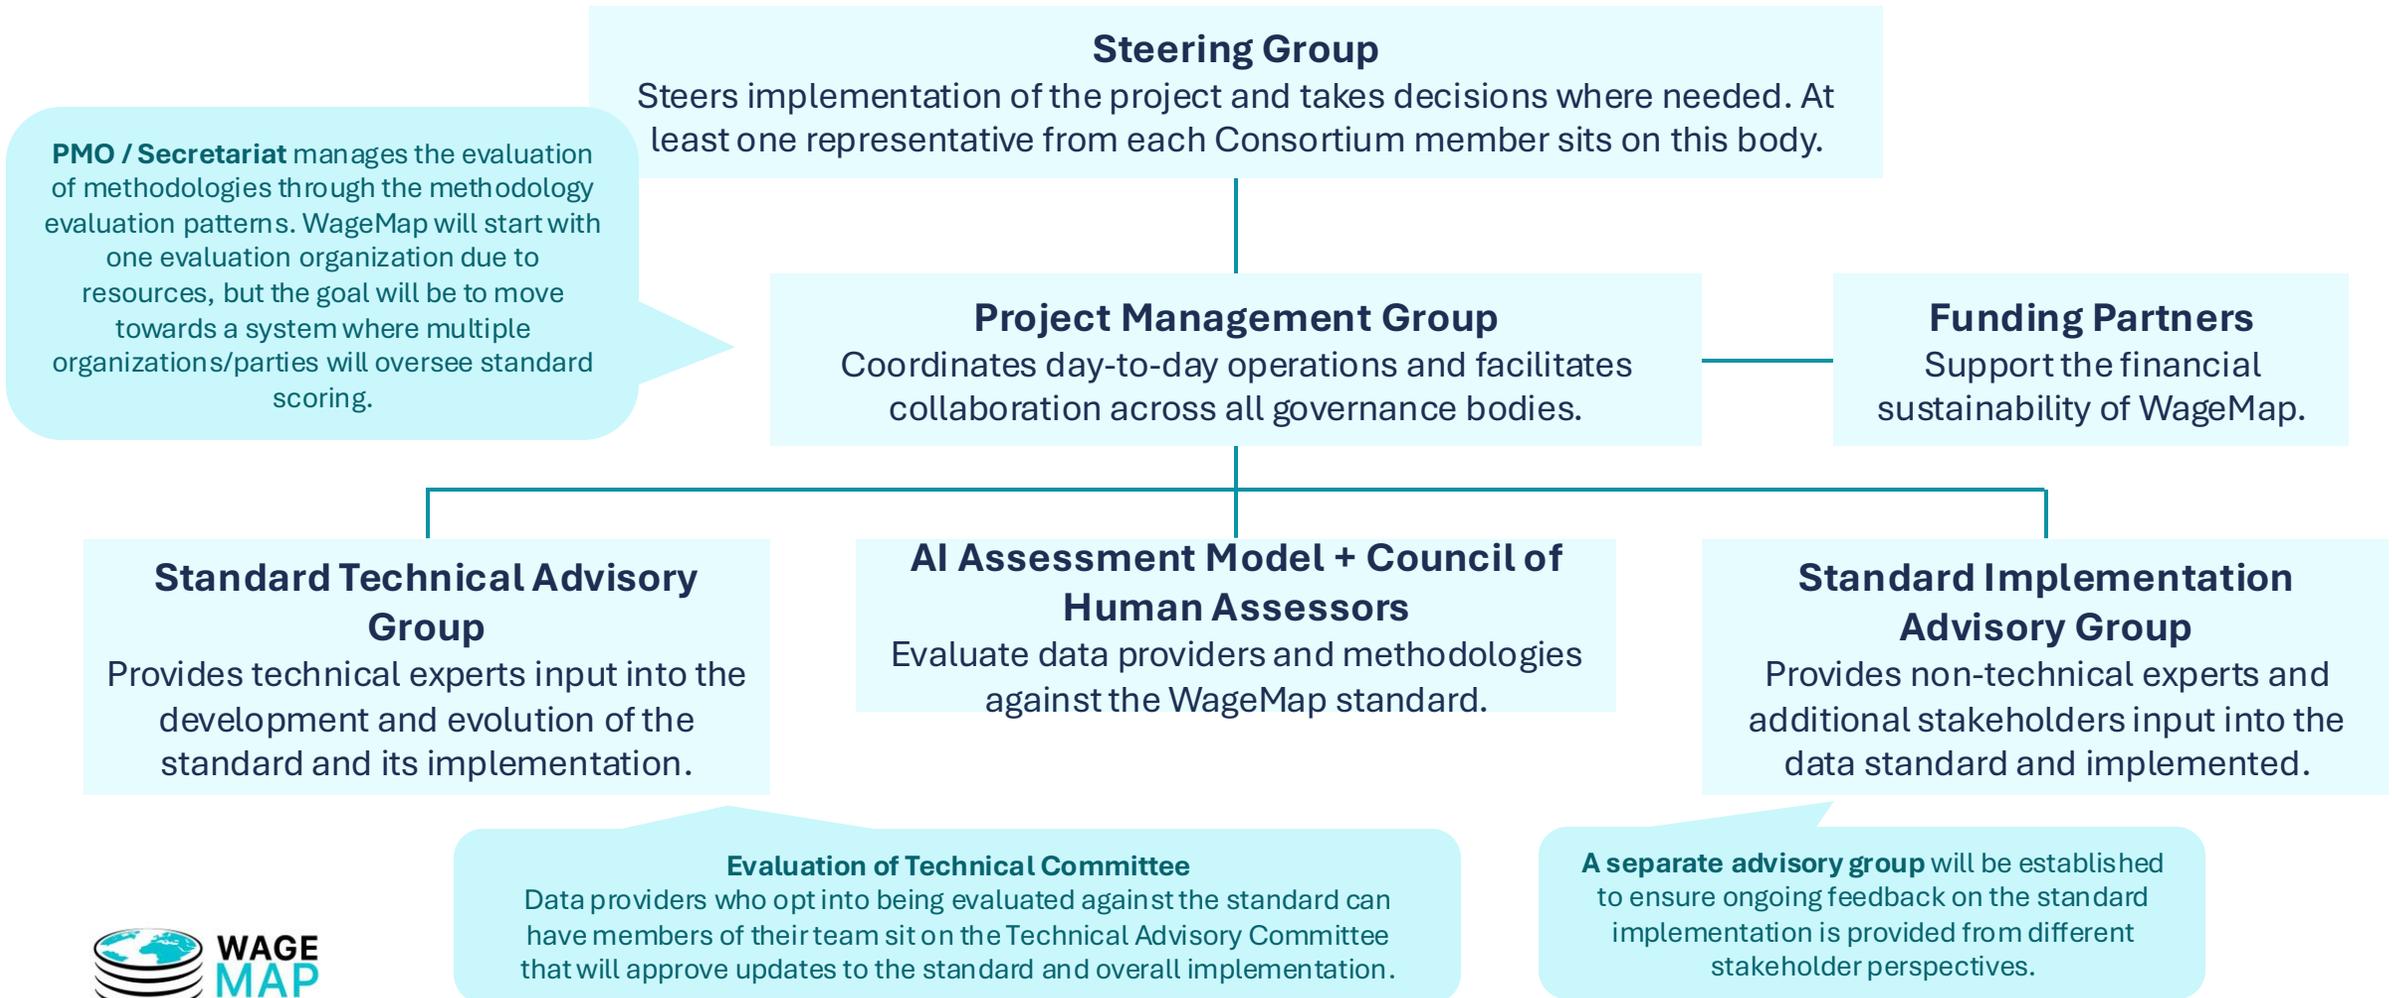

Alignment with ISO standards

Strengthen **community building and collaboration model** between data and service providers

Proposed Future Governance (~2027 onwards)

WageMap is preparing to evolve its governance and its stakeholder engagement approach after the first round of pilot data is launched at the end of 2026. **The following model is subject to change based on feedback.**

How to Engage with the WageMap Movement

Each stakeholder plays a specific role in **supporting, using, or strengthening** the Living Wage Reference Standard.

As a Data Provider

Data providers are organizations that generate or maintain living wage estimate data. Data providers can choose to **share their living wage estimates** (or just have a link to their website) and **participate directly in WageMap's evaluation and engagement activities**.

Join the 2026 Pilot!

As a Methodology Evaluator

Methodology evaluators are individual organizations or collaborators trained to evaluate living wage estimates. Methodology evaluators will initial AI-assessments estimates and provide scoring context and feedback.

As a Data User

Data users are employers or other entities that use Living Wage data to inform their living wage efforts. WageMap will **engage data users to create offerings that best meet their needs**.

Attend a WageMap event or focus group

As a Key Partner

Key partners will consist of non-profit organizations, unions, international organizations, governments, etc. WageMap will work with key stakeholders to strengthen the approach and the overall movement. Engagement can include check-ins, specialized focus groups, or collaborations on evaluation and implementation
